1 Introduction

The Standards Activity Committee Special Working Group Reference for Enumerations for Simulation (SAC SWG ENUM) publishes, maintains, supports, and updates this SISO Reference Product. The SISO Reference Product, SISO-REF-010.1, provides information for submitting enumerations and participating in the enumerations process. See 1.5 for more information.

1.1 Purpose

This document specifies the numerical values and associated definitions for those fields that are identified as enumerations in Simulation Interoperability Standards Organization (SISO) standards and in SISO-sponsored standards published by IEEE.

1.2 Scope

This document applies to enumerations that might occur in SISO standards or SISO-sponsored IEEE standards. Because entity-type enumerations have been widely adopted, their use has expanded to other standards and specifications employing these types of enumerations beyond the original usage. Thus, protocol-specific fields are included in annexes to this document.

1.3 Objective

The objective for this document is to define a consistent schema and repository for enumerations for distributed simulation.

1.4 Intended Audience

This document applies to anyone interested in distributed simulation or interoperability, including but not limited to users of Distributed Interactive Simulation (DIS), High-Level Architecture (HLA), and Test and Training Enabling Architecture (TENA).

1. The URL for the document library containing this document is: <http://www.sisostds.org/ProductsPublications/ReferenceDocuments.aspx>. Scroll down to find "SISO-REF-010."
2. The URL for the document library containing prior issues, change request templates, change requests, and other documentation is: <http://www.sisostds.org/DigitalLibrary.aspx>. From that link, select SISO Committee Information from the left window pane, then Standards Activity Committee, then Team-Group Activity, then "SAC SWG Enumerations." The Operations Manual can also be found here.
3. To subscribe to the e-mail reflector associated with the continued development of this Enumerations document go to <http://www.sisostds.org/>, register for an account (free), click on Discussion Board (logged in), select SAC-SWG-ENUM, and click on "Subscribe or Unsubscribe" under Options on the right and follow the instructions.
4. The URL for the open source tool repository and the latest Change Request (CR) status sheet is: <https://svn.code.sf.net/p/esitools/code/trunk/>. The URL for the main tools site is also on SourceForge: <http://sourceforge.net/projects/esitools/>.

5. This document uses a defined color scheme to aid readability. Normal black text is used for all existing enumerations. **Red text** signifies changes to the current version from the previous one (usually additions, but also for updates to text or footnotes). **Gray text** indicates that the enumeration has been deprecated.
6. **Gray** supersedes **Red** if the deprecation change was made in the current version. Deleted text and enumerations are not displayed at all (they simply don't exist anymore). See 7.2 of SISO-REF-010.1, Operations Manual for the Enumerations Working Group, for additional clarification of text added to the printed version to aid readability.
